Chemistry and Physics of Lipids, 57 (1991) 407—408
Elsevier Scientific Publishers Ireland Ltd.

Contents

Volume 57 (1991)

No. 1

J. Wang and A. Pullman (Paris, France), *Interactions and packing of lipids around a helical hydrophobic polypeptide. The system gramicidin A/glycerylmonooleate* 1
E. Baruch, D. Lichtenberg, P. Barak and S. Nir (Tel Aviv and Rehovot, Israel; St. Paul, MN), *Calcium binding to bile salts* 17
M. Colleau, P. Hervé, P. Fellmann and P.F. Devaux (Paris, France), *Transmembrane diffusion of fluorescent phospholipids in human erythrocytes* 29
N. Kimura, R. Tsuneta, T. Araiso, T. Koyama, N. Hasegawa, T. Ishii and K. Mukasa (Sapporo, Tochigi and Yokohama, Japan), *Fluorescence depolarization to define wobbling motion of oriented molecules in Langmuir-Blodgett films* 39
A.R. Venkitaraman, J.E. Baatz, J.A. Whitsett, S.B. Hall and R.H. Notter (Rochester, NY and Cincinatti, OH), *Biophysical inhibition of synthetic phospholipid-lung surfactant apoprotein admixtures by plasma proteins* 49
K.K. Eklund, J.E. Takkunen and P.K.J. Kinnunen (Helsinki, Finland), *Cation-induced aggregation of acidic phospholipid vesicles: the role of fatty acid unsaturation and cholesterol* 59
N. Yoshimoto, M. Suzuki and K. Sato (Hiroshima and Amagasaki, Japan), *Polymorphic transformation in asclepic acid (cis-ω7-octadecenoic acid)* 67
R.M. Epand, R.F. Epand, N. Ahmed and R. Chen (Ontario, Canada), *Promotion of hexagonal phase formation and lipid mixing by fatty acids with varying degrees of unsaturation* 75
B. Egelandsdal, K. Fretheim and O. Harbitz (Lillestrøm and Oslo, Norway), *The denaturing action of lysophosphatidylcholine as studied by calorimetric and rheological techniques* 81
W.D. Ehringer, D. Belcher, S.R. Wassall and W. Stillwell (Indianapolis, IN), *A comparison of α-linolenic acid (18:3Ω3) and γ-linolenic acid (18:3Ω6) in phosphatidylcholine bilayers* 87

Short Communications

E. De Fabiani, M. Crestani, L. Fasoli and E. Bosisio (Milan, Italy), *Effect of natural and structurally modified bile acids on cholesterol metabolizing enzymes in rat liver microsomes. II* 97
S.O. Leung and J.T. Ho (Buffalo, NY), *Effect of membrane phase transition on long-time calcium-induced fusion of phosphatidylserine vesicles* 103

Nos. 2,3 Special Issue: Phospholipid Phase Transitions

Preface v
D. Marsh (Göttingen, F.R.G.), *General features of phospholipid phase transitions* 109
P. Laggner and M. Kriechbaum (Graz, Austria), *Phospholipid phase transitions: kinetics and structural mechanisms* 121
M.W. Tate, E.F. Eikenberry, D.C. Turner, E. Shyamsunder and S.M. Gruner (Princeton and Piscataway, NJ), *Nonbilayer phases of membrane lipids* 147
B. Tenchov (Sofia, Bulgaria), *On the reversibility of the phase transitions in lipid-water systems* 165
O.G. Mouritsen (Lyngby, Denmark), *Theoretical models of phospholipid phase transitions* 179
A. Watts and P.J.R. Spooner (Oxford, U.K.), *Phospholipid phase transitions as revealed by NMR* 195
H.H. Mantsch and R.N. McElhaney (Ottawa and Alberta, Canada), *Phospholipid phase transitions in model and biological membranes as studied by infrared spectroscopy* 213

R.M. Weis (Amherst, MA), *Fluorescence microscopy of phospholipid monolayer phase transitions* 227
J.R. Silvius (Quebec, Canada), *Thermotropic properties of phospholipid analogues* 241
A. Blume (Kaiserslautern, F.R.G.), *Phase transitions of polymerizable phospholipids* 253
M. Caffrey, D. Moynihan and J. Hogan (Columbus, OH), *A database of lipid phase transition temperatures and enthalpy changes* 275
G. Cevc (Munich, F.R.G.), *Isothermal lipid phase transitions* 293
H. Hauser (Zürich, Switzerland), *Effect of inorganic cations on phase transitions* 309
H. Tournois and B. de Kruijff (Wageningen and Utrecht, The Netherlands), *Polymorphic phospholipid phase transitions as tools to understand peptide-lipid interactions* 327
K. Lohner (Graz, Austria), *Effects of small organic molecules on phospholipid phase transitions* 341
W. Knoll, G. Schmidt, H. Rötzer, T. Henkel, W. Pfeiffer, E. Sackmann, S. Mittler-Neher and J. Spinke (Mainz and Garching, F.R.G.), *Lateral order in binary lipid alloys and its coupling to membrane functions* 363
P.K.J. Kinnunen (Helsinki, Finland), *On the principles of functional ordering in biological membranes* 375
